

Acceptable Chemistry and Organic Chemistry Courses

In-Residence Courses

CH 302 Requirement (Principles of Chemistry II)	
CH 302	Standard Requirement
CH 302H	Acceptable in place of CH 302
CH 317	Acceptable in place of CH 204 or 104M and 104N

CH 328M Requirement (Organic Chemistry I Lecture)	
CH 328M	Standard Requirement
CH 320M	Acceptable in place of CH 328M under the stipulation that a student is unable to register for a section of CH 328M (time conflict or closed).

CH 328N Requirement (Organic Chemistry II Lecture)	
CH 328N	Standard Requirement
CH 320N	Acceptable in place of CH 328N under the stipulation that a student is unable to register for a section of CH 328N (time conflict or closed).

Transfer Credit Courses

CH 104M and 104N Lab Requirement (Principles of Chemistry Labs)	
CH 104M AND 104N	Standard Requirement
CH 204	Acceptable
CH 204A AND 204B	Acceptable in place of CH 204 or CH 104M AND 104N

CH 328M and CH 128K Requirement (Organic Chemistry I Lecture and Lab)	
CH 310M* and 110K*	Acceptable for Organic Chemistry I Lecture and Lab
CH 318M* and 118K*	Acceptable for Organic Chemistry I Lecture and Lab

CH 328N and CH 128L Requirement (Organic Chemistry II Lecture and Lab)	
CH 310N* and 110L*	Acceptable for Organic Chemistry II Lecture and Lab
CH 318N* and 118L*	Acceptable for Organic II Lecture and Lab

*Note: These are the course numbers that UT assigns when courses are transferred to UT. They are not the course numbers that you will see on the course schedule at the transfer institution.

Use the Automated Transfer Equivalency System to determine what course numbers UT would assign to specific courses from other institutions.

At many community colleges, chemistry (and organic chemistry) lectures and labs are grouped together and cannot be taken separately.
