

Should You Schedule an Appointment with ChE Advising or ESS Advising?

Academic Advising (Undergraduate ChE Advising Office)

- Degree Planning
- Questions about Tech Electives and Tech Areas
- Information on Pre-Req and Co-Reqs for ChE classes
- Interactive Degree Audit (IDA) Overrides

Engineering Student Services Advising (ESS Office)

- Concurrent Enrollment
- Co-ops
- Drops, Withdrawals, and OTEs
- Engineering Probation
- Graduate Courses
- Graduation
- Honors Program
- Major Change and/or Internal Transfer
- Max Hours Application
- Minors and Certificates
- Pass/Fail
- Repetition of Course
- Scholarship Policies
- Second Language Waiver Request
- Study Abroad

Marco Martinez-Trejo - Senior Academic Advisor - mtrejo@che.utexas.edu

Schedule an appointment with [Marco](#)

[Links to an external site.](#)

The Undergraduate Advising Office is located in CPE 2.706 and delivers services that support the academic and professional development of chemical engineering students. The office provides academic advising and degree planning assistance under the supervision of the McKetta Undergraduate Faculty Advisor.

The office provides assistance with academic advising, degree planning, registration procedures, degree requirements, course prerequisites, and departmental policies and procedures. Advising is also provided by individual faculty advisors who meet with CHE students during early registration periods. Undergraduate peer advisors also staff the

front desk and provide valuable information and advice about the undergraduate experience.

ESS Advising

[Engineering Student Services \(ESS\)](#)

.

The Assistant Dean for Engineering Student Services and the Engineering Student Services advisors represent the Dean in all student matters. Advisors strive to build a strong foundation for academic and professional success for all engineering students through personalized and responsive guidance throughout the four-year college experience.

The ESS Office and the Cockrell School of Engineering offers many resources for students. The undergraduate advising office and ESS Office work closely together, and there will be times when you will be referred to speak to an ESS Advisor.

Faculty Advising

Faculty Advising is required for students who are in their first 3 semesters.

Faculty advising is optional for students after they have completed their first 3 semesters.

Students will receive an email with their assigned faculty advisor, faculty advising dates, and updated information each semester. **Students are expected to:**

- First, complete/update their 4 year semester plan on Navigate
- Second, schedule & attend a faculty advising appointment

If students can not schedule an appointment with their faculty advisor (time conflict, no availability), then they can schedule an appointment with the ChE Undergraduate Advising Office with:

- An Academic Advisor
- or Peer Advisors in a Zoom drop-in session

A Navigate 4 year plan MUST be complete and updated before advising holds can be removed!

If semester plans are not complete, we ask students to work on this and contact the ChE Undergraduate Advising Office once their plan is complete. Email reminders will be sent to these students.

The ChE Undergraduate Advising Office will verify that students talked to an advisor (faculty advisor, academic advisor or peer advisor), and completed their 4 year plan. **If these steps are complete, their advising hold is removed by the ChE Undergraduate Advising Office.** Please allow 1-2 business days for advising bars to be cleared.

If a step is incomplete, (usually incomplete semester plan), we will explain the missing requirement. Students should contact the ChE Undergraduate Advising Office once they have completed all requirements to have their advising hold removed.

The Navigate semester plan is replacing the Excel spreadsheet that has been used prior to spring 2022. *The Navigate semester plan also allows the ChE Undergraduate Advising Office to download future enrollments for our course offerings which we can use to inform our course scheduling plans. We can predict enrollment for CHE courses and plan accordingly for larger room or second course offering.*

ALL students are expected to update their semester plan each semester! Updating your semester plan will allow you to visually see your expected graduation timeline and the course load for each semester.

Guidelines for Faculty Advising

This simple and easy-to-use template is design to get the conversation started during faculty advising while making sure you are prepared for your meeting. The script below will provide the basics you will fill in the rest!

Prior to faculty advising please prepare/review the following materials:

1. Run a Degree Audit
2. Review Arrangement of Courses with Prerequisites to identify next courses in sequence.

3. Prepare a list of “non-negotiables” for next semester.
These are courses you need to take in sequence to keep you on track to graduate in 4 years.
4. Prepare a list of alternatives you can use to fill your schedule.
5. Update your Navigate plan according to courses completed on the degree audit.

Peer Advising

Peer Advisors are available via Zoom or in-person (CPE 2.706)

Monday - Friday (except holidays)

10:00 AM - 12:00 PM & 1:00 - 4:00 PM

Please check in for drop-ins here:

https://utengineering.navigate.eab.com/app/#/my/host/as3/appointment-drop-ins-results?care_unit_id=2&service_id=52&location_id=6

[Links to an external site.](#)

Peer Advisors are current Chemical Engineering students who answer general questions about the ChE degree and work at the undergraduate advising office. Peer Advisors provide great insight on courses, answer quick questions, advise on the major, and help support our students. Stop by and talk to our Peer Advisors!

Engineering Student Services

This page provides students with centralized access to policies and procedures managed by the Dean's Office (ESS). The table below includes links to commonly referenced resources related to academic policies, requests, and exceptions. Students are encouraged to review the appropriate policy before submitting a request or contacting ESS.

ChE Course Nicknames

Y'all are wild and have come up with your own language for what you refer to ChE courses as. Here is a mini dictionary of the course lingo we have heard:

CHE course nicknames

CHE 210 - 210

CHE 317 - 317

CHE 319 - Transport

CHE 322 - Thermo
CHE 333T - Communications
CHE 338 - Biochem
CHE 348 - Numerical
CHE 350 - Materials
CHE 354 - Ops 1
CHE 363 - Ops 2
CHE 360 - Process
CHE 264 - Senior Lab
CHE 372 - Reactor
CHE 253K - Stats
CHE 253M - Fun Lab
CHE 473K - Plant

What is Research for Credit?

WHAT IS RESEARCH FOR CREDIT?

Students perform supervised undergraduate research projects and receive credit applied toward their Chemical Engineering degree. Students must find a Research opportunity before registering for this class. We **DO NOT** match students to a research opportunity.

CAN IT COUNT TOWARDS MY DEGREE?

A maximum limit of one whole Tech Elective (either CHE 377K/L or a combination of Research for Credit courses that adds up to 3 Hours) can be taken as one of the students four required Tech Electives to count in ANY area. A separate course of Research for Credit can also be counted towards the 4-HR Chemistry Elective Lab requirement. This means in total, a student can have Research for Credit count for ONE Tech Elective and the Lab Portion of their required 4-HR CH Elective.

HOW DO I REGISTER?

You are **REQUIRED** to submit a Research for Credit Form prior to registering for the class. When completing the form, you will either choose CHE 177K/L, CHE 277K/L, or CHE 377K/L. Rule of thumb: 3 Hours per week in lab equals 1 Credit Hour; with K being the first time you take Research for Credit and L being the second time you take Research for Credit or any time after. Once you submit the form, an advisor will process the form and either give you the ability to add the class on your own or add you themselves.

PRE-REQUISITES FOR THE COURSE

- Minimum GPA of 3.0. If you DO NOT have a GPA of at least 3.0, you will also need to ask the CHE Department Faculty Advisor for permission to take a Research for Credit course.
- Your PI must be in ChE. If they are not under ChE, you will need to ask the CHE Department Faculty Advisor for permission to earn research credit with a PI outside our department.
- Students must submit a completed Research for Credit Form to the CHE Advising office (CPE 2.706 or via email at advising@che.utexas.edu).
- Students CANNOT take Research for Credit if it is their first semester at UT Austin.
- Must be a CHE Major. If you are doing Research for Credit with a CHE Faculty member, I recommend reaching out to your Major Advising Office to see if there is an appropriate Research for Credit course in your major. This class is how we track CHE majors doing Research for Credit.

COURSE SYLLABUS

[CHE Research for Credit Syllabus](#)

NOT SURE WHERE TO START?

Follow these steps to find an undergraduate research opportunity:

1. Review the [Research Areas](#)
2. [Find a Faculty Member](#)
3. [Find a Faculty Member](#) within the department.
4. Identify 2-3 faculty members whose research interests you.
5. Request a meeting with the faculty members and include your resume.
6. Meet with the faculty members and express your interest in their research.
7. Ask if they have any paid or volunteer research opportunities for undergraduate students.
8. Follow up your meeting with a brief thank you by email and reiterate your interest in their research.
9. If invited to join a lab and you want to do Research for Credit (**ONLY IF NOT PAID**), complete and submit the [Research for Credit Form](#) NO LATER THAN 4 PM ON THE 6TH DAY OF CLASS.

Enrollment While Having a Co-op or Internship

Internships and Cooperatives are a great way to get some of that real world experience within your degree program.

Students with an approved ECAC Co-op will be eligible to enroll in co-op coursework that maintains full-time enrollment while earning course credit.

2 credit hours of co-op for a long semester (fall and/or spring) and 1 credit hour of coop for a summer semester.

[Co-op Program](#)

•

Three credit hours of co-op will count as one tech elective in any area.

Students without an approved ECAC Co-op can use a zero-credit course offered through Chemical Engineering to maintain enrollment while completing a co-op or internship.

CHE 079I: Undergraduate Research Internship

[CHE 079I Syllabus](#)

[Application for Enrollment](#)

[Links to an external site.](#)

Enrollment is only available through the 12th class day of the semester you wish to enroll.

International students needing course enrollment for CPT will use CHE 079I for the [CPT application](#), if not approved for ECAC co-op credits.

Freshman Orientation

Congratulations on becoming a UT Longhorn!

You are one of thousands of students who applied to UT and you made it!! You will be receiving information to attend [New Student Orientation](#)

-

so please make sure to check your emails and follow their instructions. During Orientation we will tell you all about the Chemical Engineering major, talk about your fall classes, and much more. Can't wait to see you!

More information is listed on the Support Services page on the ENGRDIRECT website - <https://students.engr.utexas.edu/support-services/new-student-orientation>

-

Dual Credit

If you have taken dual credit, please [submit your final transcript](#)

.

from the community college/university you took courses at. The evaluation of transcripts may take a few weeks to process. Having a copy of your dual credit will be helpful during your advising appointment.

AP/IB Credit

If you have taken any AP credit or IB credit, please make sure and send your scores from College Board so those courses can be evaluated. If you have taken AP/IB exams during your senior year of high school then those scores won't be available until July. It is important to have a list of the exams and the scores you received so the advising office can help you determine courses for your upcoming schedule. An advisor will speak with you to determine which AP courses are best to accept for credit towards your degree.

Once your College Board transcript has been evaluated, you are ready to accept your credits! Click [here](#)

.

to learn how to accept your AP credit. It is recommended to wait to accept your AP credit until you meet with your academic advisor.

Transfer Orientation

Congratulations on becoming a UT Longhorn!

You are one of thousands of students who applied to UT and you made it!! You will be receiving information to attend [Longhorn Orientation](#)

[Links to an external site.](#)

so please make sure to check your emails and follow their instructions. During Orientation we will tell you all about the Chemical Engineering major, talk about your fall classes, and much more. Can't wait to see you!

You will have a scheduled advising appointment to discuss your transfer credit, and upcoming classes. There may be times when your transfer credit isn't evaluated as 'equivalent' to major UT courses. If applicable, your advisor may recommend to petition your transfer course. Please note, petitions are never guaranteed for approval. A copy of the course syllabus is required to proceed with the petition process. More information will be provided by your advisor.

More information is listed on the Support Services page on the ENGRDIRECT website - <https://students.engr.utexas.edu/support-services/new-student-orientation>

•

Exchange Orientation

Welcome Exchange Students!

We are happy to have you at The University of Texas! There are several steps that are required before you can begin registering for classes. Make sure you are reading emails from [Texas Global](#)

•

and follow their instructions. You will be advised by an undergraduate advisor during orientation, but there are a few things you can get started on before your advising appointment. The information below provides detailed instructions on how to communicate with professors and ask permission to take their courses.

As a general rule we require faculty approval in order to enroll in CHE courses. Our faculty are better able to identify prerequisites on your record so that you can be successful in their course. Without faculty approval you will not be allowed to enroll in the course. Included is a sample email request below to modify for your needs.

Please note, if you are interested in the undergraduate labs (CHE 253M or CHE 264) make sure you have completed all of the required prerequisites for these courses. Dr. Landaverde Alvarado will not approve you to be in the course if you have not completed the required prerequisites, so please do not contact him.

Hi Dr. XXXXXXXXX,

*My name is XXXXXXXXXXXX. I am an exchange student from XXXXXXXXXXXXX for **Spring 2024.***

I am interested in taking CHE XXX this spring. I am seeking your approval in order to enroll this in the course.

At my home institution I have taken the following courses:

Pick 2 or 3 courses you believe would be relevant to the course you are requesting

I believe these courses have prepared me to be successful in your class.

I have attached an unofficial transcript with this email for a complete list of courses I've completed.

Please let me know what additional information you might need in order to consider this request.

Best,

XXXXXXXXXXXXXXXXXX

If approved, please forward approvals to advising@che.utexas.edu. Note, approval does not guarantee a seat in the class. There will still need to be open seats in the class in order for you to register.

The advising office will waive prerequisites for any approved course so that you can register on **date** when registration opens.

Please review the materials on the website linked below to prepare you for our registration system.

Building Community at UT

[Chemical Engineering Student Orgs](#)

[Links to an external site.](#)

There are many organizations and professional societies to join at The University of Texas at Austin, and the following groups are relevant to the McKetta Department of Chemical Engineering. An overview of other Cockrell School of Engineering related organizations can be found at the [Cockrell School's Office of Student Life webpage](#)

[Links to an external site.](#)

. The university also offers a host of student groups and organizations from recreational sports teams, special interest or political groups, to religious, honorary, and social organizations. Visit the [Office of the Dean of Students website](#)

[Links to an external site.](#)

to find out more about student organizations across the university.

[Disability Cultural Center](#)

[Links to an external site.](#)

The DCC serves as a hub on campus for community, education and advocacy for disabled students, faculty, staff and all members of the university community. The DCC encourages interpersonal connection and collaborative learning toward more equitable spaces for disabled people in collaboration with other DCCE/UT departments.

Establishing a DCC sends the message that UT Austin recognizes disabled people as an integral part of the campus community. The first of its kind in Texas, the DCC positions UT Austin as a leader in exploring more equitable futures for disabled people who study, teach, and work in higher education.

[HornsLink](#)

[Links to an external site.](#)

Discover unique opportunities at University of Texas at Austin!

[Longhorn SHARE](#)

[Links to an external site.](#)

Genuine social connection and belonging can be a challenge for many people during college, particularly in recent years and as demand for mental health support continues to rise. The Longhorn SHARE Project was created to address this need by providing opportunities for students to responsibly engage in non-clinical, reciprocal, mental health-focused peer support.

Financial

[ChE Student Emergency Fund](#)

[Links to an external site.](#)

The **McKetta Department of Chemical Engineering** is committed to providing active support for undergrad and graduate students facing various life crises that may negatively impact our students' ability to succeed academically. The **Texas ChE Student Emergency Fund** has been created to provide supplemental financial support to the university's Student Emergency Fund.

Types of verified emergencies that may be supported by the Texas ChE Emergency Fund include (but are not limited to):

- Medical and dental emergencies
- Replacement of belongings lost in a fire or natural disaster
- Safety-related needs (e.g. lock change, emergency shelter due to roommate or domestic violence, etc.)
- Urgent travel due to a family emergency
- Medication/prescription expenses

The Texas ChE Student Emergency Fund cannot support:

- Rent/Housing
- Budgeted/recurring expenses (e.g. car payment, health insurance, etc.)
- Tuition

Student Emergency Fund

Links to an external site.

The Student Emergency fund exists to provide financial support when a verified emergency has impacted a student's health, safety, or wellbeing. An emergency is an urgent, sudden, and serious event that necessitates immediate action to remedy harm to life, health, or property.

Types of verified emergencies that can be used to apply for the Student Emergency Fund:

- Medical treatments such as hospitalization,
- Utilities through the City of Austin,
- Medication/prescription expenses,
- Replacement of belongings lost in a fire or natural disaster,
- Safety-related needs (e.g., lock change, emergency shelter, etc.),

Student Emergency Fund cannot support with:

- Rent/Housing
- Budgeted/On-going expenses (car note, subscriptions, etc.)
- Technology needs
- Tuition

Eligibility Requirements

- Must provide documentation of recent, short-term emergency needs.
 - Must be currently enrolled to apply and at the time of award distribution.
- Student Emergency Fund awards cannot be distributed after the last day of the semester or session.**
- The final determination must be approved by the Office of Scholarships and Financial Aid.

Awards vary and are based on the availability of funds.

[Student Emergency Services](#)

[Links to an external site.](#)

Our office helps students and their families during difficult or emergency situations. Assistance includes outreach, advocacy, intervention, support, and referrals to relevant campus and community resources. **Please note, our office does not provide counseling services.**

You can best access services available through SES by completing an online form or emailing studentemergency@austin.utexas.edu.

Emergency situations include but are not limited to:

- Missing Student
- Family Emergency
- Fire or Natural Disaster
- Student Death (current or former)
- Medical or Mental Health Concern
- Academic difficulties due to crisis or emergency situations
- Interpersonal Violence (stalking, harassment, physical and/or sexual assault):

Title IX

÷

The Title IX Support and Resources case managers work with all parties (students, faculty, and staff) involved in a matter reported to the Title IX Office to provide accommodations, support, and resources in a variety of ways. Some examples include, but are not limited to:

- Notifying faculty for a student's absences or missed work
- Advocating for flexibility in assignments or deadlines
- Facilitating workplace accommodations
- Making referrals to resources both on and off campus to meet an individual's needs of personal health, safety, and security
- Assisting parties in understanding the complaint and grievance process from start to finish
- Connecting both Complainants and Respondents with Advisors provided by the University, if desired or needed
- Facilitating accommodations for students who are pregnant, nursing, and/or parenting

Title IX Support and Resources strives to offer fair, equitable, and individualized support to Complainants, Respondents, and Witnesses affected by Title IX-related matters. Title IX Support and Resources case managers are able to refer individuals to critical resources on campus and in the community. Although Title IX Support and Resources

case management is non-confidential, case managers can refer individuals to confidential resources.

Safety

UT has safety resources for all students!

[Safety Apps](#)

Students should take steps daily to ensure their personal safety. Download the Austin Police Department App and Austin 3-1-1 App to your phone.

[Sure Walk](#)

If you are on campus late and have concerns about your safety getting home, all students, faculty, and staff can request Sure Walkers to accompany them. Two Sure Walkers may accompany you on your walk home or provide a complimentary cart or car ride, depending on service area.

[Self-Defense Classes](#)

[Rape Aggression Defense \(RAD\) System](#) is a program of realistic, self-defense tactics and techniques. It is a comprehensive course that begins with awareness, prevention, risk reduction and avoidance, while progressing to the basics of hands-on defense training.

- RAD classes are offered at no charge to university students, faculty members and staffers

ChE Computer Labs 24/7 Access Request

Need access to the computer labs? Click the link below and complete the form!

https://utexas.qualtrics.com/jfe/form/SV_bvgwo0YkSSbZdKR

General FAQ

- **Who is my academic advisor? How do I make an appointment?**
 - In ChE, we do not assign students to an advisor. Students are welcome to schedule an appointment with our Senior Academic Advisor or the Academic Advising Coordinator.
- **Where is the undergraduate advising office located?**
 - We are located in CPE 2.706
- **What can my academic advisor help me with?**

- Academic advising is more than helping you choose classes and make a long-term degree plan! We are here to help you succeed in all aspects of your UT experience. We can help you clarify personal and career goals and develop consistent educational goals. Your advisor will also help guide you to other University resources and services to support you in your goals and needs.
- **When should I see an academic advisor?**
 - Academic advising is available on an ongoing basis, not just during registration periods. Advisors are available to assist with degree planning and course selection, help students who are struggling academically and non-academically, and provide information about UT's numerous resources.
- **Who can I talk to if I am struggling with my course load?**
 - Your academic advisor is here to help! We can suggest campus resources for tutoring, recommend strategies to meet with professors and TAs, and provide referrals to non-academic counselors and mental health resources. Your advisor can also discuss options for taking a course pass/fail, using a Q drop or using your One-Time Exception Q Drop. You can also work together to complete long-term degree planning with you to map out the best combination of science and non-science courses for your academic success.

Degrees FAQ

- **How do I change my major?**
 - Students wanting to **change majors outside of ChE** will need to follow the internal transfer process for their intended degree. Most programs offer information sessions for internal transfer applicants and have a website with more detailed admissions information. Students considering internal transfer can meet with an advisor in the [Vick Advising Excellence Center](#)

- [Links to an external site.](#)
- .
- Internal transfer is also the name for the process to attempt to switch to another Engineering major in Cockrell.
- Students wishing to add a second major will also need to complete an Internal Transfer application for that college.
- **Can I complete a minor?**
 - Chemical Engineers earn a Bachelor of Science degree, which does not require a transcript-recognized minor or certificate, but students may still be able to complete one alongside their major. Students should check with their advisor for more information.
- **How do I add a transcript-recognized minor/certificate to my degree?**
 - Each minor and certificate offered by the University has its own website with information about application requirements and procedures. After a student has applied and been accepted to a program, they will be prompted via SAN to contact their academic advisor so the minor or transcript can be added to their degree profile. Minors and certificates become active on the 20th class day of each semester. For an attached minor or certificate to improve a student's registration time or enable a student to register for restricted courses, it must be attached and in effect by the 20th class day of the semester.
- **How do I run a degree audit?**
 - [Run a degree audit on UT Direct](#)
 - [Links to an external site.](#)
 - . Please make sure you are running an audit in the correct catalog to see accurate degree requirements. If you are unsure, connect with your academic advisor!
- **What courses are considered upper-division?**

- Courses with the last two digits between 20 and 79 (e.g., CHE 322, CH 320M) are upper-division courses. Those with the last two digits lower than 20 are lower division (e.g., CHE 210).
- **What counts as an elective?**
 - Any course that does not fulfill a specific degree requirement will be counted in a degree audit as an elective. To complete a degree in ChE, you need to complete a minimum of 129 credit hours and fulfill all other degree requirements. You also need to plan for a minimum of 60 hours taken in residence at UT. Many students will need to complete elective hours in order to reach these credit hour minimums, and these hours can be fulfilled with non-science courses.
- **How do I select or change my Technical Area(s)?**
 - Students should review our how-to guide [here](#).

Grade Concerns, Disputes, and Appeals – Procedure

If you believe there has been a **mistake** in your grade, please follow this process.

Grade concerns must be supported by **specific evidence** that an error was made (e.g., miscalculation, missing assignment that was submitted, incorrect rubric).

1. Start with the relevant instructor

- Contact the faculty member who assigned the grade.
- Clearly explain **what you believe is incorrect** and provide **supporting documentation** (screenshots, graded work, rubric, email confirmations, etc.).
- Requests that are based only on a desire for a higher grade, without evidence of an error, will not be considered a formal grade dispute.

2. If not resolved – Undergraduate Office

- If you and the instructor cannot resolve the issue, contact the **Undergraduate Office**.

- Be prepared to share the evidence you provided to the instructor and a summary of your communication with them.

3. If necessary – Faculty Undergraduate Advisor

- The Undergraduate Office may refer the matter to the **Faculty Undergraduate Advisor** if additional review is needed.
- The Advisor will review the **evidence of a possible mistake** and the steps already taken.

4. If necessary – Department Chair

- In **rare** cases where the concern remains unresolved, the Faculty Undergraduate Advisor may elevate the issue to the **Department Chair**.

Our goal is to address all grade concerns **fairly, consistently, and based on documented evidence of error**, and to resolve them as close to the source as possible. Please follow these steps in order so we can help you efficiently.

Registration FAQ

- **What do I do if the course I want to get into is closed or reserved?**
 - If a class you want to get into is closed or reserved, continue to check the course schedule periodically. There's a possibility that additional seats in classes will become available. Courses/sections may open up when other students rearrange their schedules or when students are dropped from courses because they do not meet the prerequisites.
 - If you are entering your last semester and need a specific course in order to graduate, contact our office.
 - Remember that the registration cycle for each semester has multiple opportunities to add classes through the 6th class day of the semester, and drop classes through the 12th class day of the semester. Check your Registration Information Sheet ([RIS](#))
 - [Links to an external site.](#)

-) to see all of your registration times. It's important to have back-up options when registering.
- Check your degree audit or contact your advisor for additional suggestions for the semester.
- **Can I add myself to a waitlist for a course I want?**
 - Yes, if available. Students can add themselves to available waitlists through the registration system online. Use the registration system to set up an automatic swap if you get off the waitlist for the class you prefer.
 - Being on a waitlist is **not** a guarantee for getting into a class. Plan for additional options for your degree as a backup.
 - **Please remember to verify your swap class!!!** Many students forget to update or add a swap class. Students typically receive an error email if the waitlist system attempts to add them to the course but encounters a time conflict, max hours, or an incorrect swap class. Make sure you are constantly checking that your swap course is correct or that you have been approved for max hours.
- **My registration time seems really late. How can I improve my registration time?**
 - Your registration time is determined on the 20th class day of the current semester by the Registrar's Office based on your percentage of degree completion. You can check your percentage by running a degree audit (IDA). To ensure you are assigned the best possible registration time, make sure you complete the following by the 20th class day of the semester:
 1. [Claim AP/IB credit](#) for courses that will count towards your degree. If you are unsure about which credits you should claim, meet with your academic advisor.
 2. [Send in transcripts](#)
 3. [Links to an external site.](#)

4. from other universities and/or community colleges. This includes community college transcripts from dual credit courses you may have taken in high school.
- **I can't access a course I need for my minor or certificate. Who do I contact?**
 - Departments manage reservations for courses they offer. You will need to contact the department offering the course to learn about their registration process. Pursuing a minor or certificate does not necessarily guarantee a student access to specific courses.
 - **What are the prerequisites for a specific course?**
 - Prerequisites for all courses are listed in the [Course Schedule](#)
 - [Links to an external site.](#)
 - . Students should assume all course prerequisites are enforced. If you do not meet the prerequisites for a course you are registered for in a future semester, you will be dropped from that class and will need to register for a replacement course.
 - **Did something change recently with the introductory Chemistry labs?**
 - The Chemistry department now offers two 1-hour labs (CH 104M and CH 104N) instead of one 2-hour lab (CH 204). The new two 1-hour labs will satisfy the introductory Chemistry lab requirement.
 - It is strongly recommended that students enroll in CH 104M concurrently with CH 301, and then take CH 302 and CH 104N together the following semester.
 - ChE students who have AP/IB credits from their AP Chemistry should claim their General Chemistry courses.
 - **What happened to flag requirements? How do I find a writing intensive course for my core?**
 - On Monday, April 7th, 2025, the interim Provost [sent an announcement to students, staff, and faculty about the discontinuation of the Flags requirement](#)
 - [Links to an external site.](#)

- (besides the core writing requirement). The Registrar's Office is providing some ongoing answers to FAQs.
- A 3-hour course with an intensive writing component is still part of the state's mandated core curriculum and will continue to be a required course prior to graduation. Previously, students and advisors may have thought about this core requirement as part of the writing flag requirement in a student's degree. This writing-intensive course may be upper- or lower-division but must be separate from other coursework used toward the core.
- Students in our major will complete this core requirement with E S 333T.

Claiming & Transferring Credit FAQ

- **Which courses should I claim for credit?**
 - Talk with your academic advisor before claiming any credit. The options you should claim may vary based on your degree, career goals, or prior coursework. You can follow the [How to claim credit](#) guide here.
- **Can I take core courses outside of UT?**
 - Courses can be taken outside of UT during any semester, including fall, spring, minimesters (December and May), and summer. Check with your advisor for more information. Students will need to complete the concurrent enrollment appeal [here](#)
 - [Links to an external site.](#)
 - . Students will need to cross-reference the [current core list](#)
 - [Links to an external site.](#)
 - and the [Automated Transfer Equivalency system](#)
 - [Links to an external site.](#)
 - .
- **How do I know if a course I took at another institution will transfer to UT?**

- Use UT's [Automated Transfer Equivalency](#)
- [Links to an external site.](#)
- website to search for the sending institution and the equivalent course codes at UT. Keep in mind that the ATE system is historically cumulative (meaning that courses listed may not be currently offered) and that the ATE system does not certify degree applicability. Students should check with their advisor if they're uncertain or have additional questions **before** registering for coursework elsewhere.
- **Which Government courses can I take for my core requirements?**
 - Check with your advisor about the [Government combination that will work for you](#)
 - [Links to an external site.](#)
 - .
- **How do I transfer credits I took at another institution to UT?**
 - If you have credits from a community college or other institution you want to use toward your degree, you'll need to send in a transcript to UT Admissions for processing. There will likely be a fee associated with ordering and sending a transcript from the other institution. It can take a while for transcripts to process, so be sure to send it in as soon as possible. Visit the [Transcript Submission section in Admissions](#)
 - [Links to an external site.](#)
 - for details on how to submit your transcript from another school for transfer credits.
- **How long are AP credits valid for?**
 - Your scores are valid for 10 years, so you should not be in a rush to claim elective credits. You'll communicate with your advisor throughout your time at UT to monitor your progress, and together you'll determine if it makes sense to claim elective credits.
- **Should I claim scores for credit or for placement?**

- You should claim scores for credit unless you've been told otherwise by an advisor.
- **How do I claim AP credit for GOV 310L?**
 - You will need to take the UT Austin Test in Texas Government to supplement your score on the AP Government and Politics exam. Before your eligibility for GOV 310L credit can be determined, you must arrange to take the UT Austin Test on Texas Government, which is offered only on the UT Austin campus. It is offered one time per month. Dates for the next month's test are updated on the 23rd of each month. Visit the [Test Registration System](#)
 - [Links to an external site.](#)
 - to view and register for upcoming test dates.

Graduation FAQ

- **When do I apply for graduation?**
 - UT confers degrees in fall, spring, and summer semesters. [Students apply for graduation](#)
 - [Links to an external site.](#)
 - during their final semester at UT by the appropriate deadline. Applications are available around the 12th class day of the semester.
- **Where can I find information about graduation ceremonies?**
 - Students will receive an email with graduation information after their application is processed. They can also visit [here](#)
 - [Links to an external site.](#)
 - .
- **Can I participate in graduation ceremonies if I'm taking my final classes over the summer?**
 - Students who have 15 or fewer credit hours remaining during the summer can apply to participate in the May ceremony. Students should complete the intent to graduate application during the spring

semester and list their graduation term for the summer. Students completing their final UT degree requirements at another institution must apply to graduate *in absentia*. More information can be found [here](#)

- [Links to an external site.](#)
- .

- **How do I know if I've met all of my degree requirements in order to graduate?**

- You should run a degree audit before and after every registration period and after changing your registration (e.g., after adding/dropping courses, using a Q drop, switching a course to pass/fail, or not passing a course). Once your degree audit reaches 100%, including any minors/certificates you intend to complete and with future courses, you are able to graduate.
- Remember, running an audit with your intended minor/certificate does NOT mean that you have applied for the minor/certificate or that it is attached to your degree profile. Check with your advisor if you are unsure of whether or not your minor/certificate is attached.

- **It's my last semester and I want to take less than 12 hours. Is that okay?**

- It depends. To be a full-time student, you must register for and enroll in a minimum of 12 hours at UT. Full-time status is usually necessary to receive financial aid, maintain eligibility for student employment (like being a TA), live in on-campus housing, compete on a University athletic team, be covered under parents' health or car insurance, receive Veterans' Benefits, or be an international student. Please consider whether you are affected in any way by part-time status before enrolling for fewer than 12 hours. Taking elective courses is also a good way to explore other interests and enrich your experience at UT before you graduate.
- You could request to be labeled as full-time with part-time hours in the graduation application. We still recommend confirming with the

offices that may require you to be in for 12 hours to see if they are okay with you being part-time during your final semester.

- **When will I receive my diploma?**
 - Students can [expect their physical and digital diplomas](#)
 - [Links to an external site.](#)
 - 6-8 after the end of the semester.

How do I select or change my Tech Area(s)?

How to Select or Change Your Tech Area(s)

Welcome! This page provides all the information you need to **declare, change, or petition your Tech Area(s) courses** in the Chemical Engineering degree. Please read the instructions carefully and use the resources below to make informed decisions.

Available Tech Areas

You may choose from the following Tech Areas:

- 1.) Process Systems and Product Engineering**
- 2.) Materials Engineering**
- 3.) Environmental Engineering**
- 4A.) Cellular and Bioprocess Engineering**
- 4B.) Biomedical Engineering**
- 5.) Energy Technology**
- 6.) Engineering Economics and Business Leadership**

Important Note: Faculty and Academic Advisor Roles

- **Faculty Advisor:**

Before selecting or changing your Tech Area, it is highly encouraged to speak to your faculty advisor about the areas you are interested in and the courses that best align with your academic and career goals. Please note that it is not required to meet with them to declare or change your Tech Area. Faculty advisors could provide insight into the content, research opportunities, and career paths associated with each area.

- **Academic Advisor:**

Your academic advisor can assist you with the administrative process of declaring or changing your area and help you create a long-term academic plan.

Verifying your Tech Area(s)

Make sure that your degree profile matches the Tech Area(s) that you are pursuing. You can review this in your IDA profile.

How to View Courses for Each Area

To see which courses count towards each Tech Area, **review the official course list:** [Tech Area Course List \(PDF\)](#)

How to Declare or Change Your Tech Area(s)

You have several options to **declare or change your Tech Area(s)**:

- **Online Survey:**

Fill out the official survey to declare or change your area:

[Tech Area Declaration/Change Survey](#)

- [Links to an external site.](#)

- **Schedule an Appointment:**

You may also come in for an appointment to change your area.

- **Email our office**

Please email us at advising@che.utexas.edu with your request.

Petitioning a Course Not Listed

If you want to count a course toward your Tech Area and it is **not listed in the official course list**, you may petition for approval.

Instructions for petitioning a course can be found here:

[How to Petition a Class to Count as a Tech Elective](#)

Useful Links Recap:

- [Tech Area Course List](#)
- [Petition Instructions](#)
- [Tech Area Declaration/Change Survey](#)
- [Links to an external site.](#)
-

Remember:

- It is highly suggested to discuss your academic interests with your faculty advisor before making your selection. However, it is not required to select your Tech Area.
- Use the survey for quick changes, or schedule an appointment for administrative assistance or long-term planning.
- Petition courses if you believe a class should count toward your Tech Area.

If you need further assistance, please reach out to the undergraduate advising office!

Can I Petition a Class to Count as a Tech Elective?

* Our preapproved tech electives can be found [here](#)

.

* New courses are added all the time. Are you interested in a course not currently on the tech elective list?

* Students can petition for courses not currently on the tech elective list.

* Petitions are reviewed by the Undergraduate Faculty Advisor (currently Dr. Keith Keitz).

Tech Elective Petition Process

1. Gather the syllabus for the course in question.

For courses previously offered you can use the University's syllabi [site](#).

For new courses, you might have to reach out to the faculty member or department offering the course.

2. Complete the [survey](#)

[Links to an external site.](#)

.

Can I Stay Enrolled at UT Austin While Having a Co-op or Internship?

Internships and Cooperatives are a great way to get some of that real world experience within your degree program.

Students with an approved ECAC Co-op will be eligible to enroll in co-op coursework that maintains full-time enrollment while earning course credit.

2 credit hours of co-op for a long semester (fall and/or spring) and 1 credit hour of coop for a summer semester.

[Co-op Program](#)

÷

Three credit hours of co-op will count as one tech elective in any area.

Students without an approved ECAC Co-op can use a zero-credit course offered through Chemical Engineering to maintain enrollment while completing a co-op or internship.

CHE 079I: Undergraduate Research Internship

[CHE 079I Syllabus](#)

[Application for Enrollment](#)

[Links to an external site.](#)

Enrollment is only available through the 12th class day of the semester you wish to enroll.

International students needing course enrollment for CPT will use CHE 079I for the [CPT application](#), if not approved for ECAC co-op credits.

Can I Take a Grad Course?

Requirements:

- Students must qualify to enroll in graduate courses.
- Applications must be complete before the 12th class day
- More info here: [Undergraduates Taking Graduate Courses](#)

How Can I Add a Minor or Certificate?

- If you've already applied for a minor or certificate, please fill out the 'Degree Audit Survey' once you have received a SAN (Secured Academic Note) so the minor/certificate can be added to your record. **Timing is everything!**

Minors and certificates can reduce your percent complete in IDA which can impact your registration time.

- Minors and certificates are **NOT REQUIRED** for the Chemical Engineering degree
- By adding a minor and certificate, there is a chance that you will be extending your 'expected graduation' by a semester or two

Browse through the [minor and certificate programs](#)

÷

for more information

How Do You Get on Scholastic Probation?

A student is placed on engineering probation when either:

1. Their grade point average for their major area of study courses taken in residence falls below a 2.00 OR
2. Their required technical course GPA taken in residence falls below a 2.00

More information regarding the probation and dismissal process can be found on the ENGRDIRECT website -

<https://students.engr.utexas.edu/policies-forms/probation-and-dismissal>

÷

What is a Degree Audit or IDA?

And Interactive Degree Audit (IDA) provides you with a report of your progress toward completion of the requirements for a specific program. For more detailed information about running a degree audit for your degree plan, watch the How To Run Your Interactive Degree Audit video below.

- If you see an issue with your degree audit, fill out the "[Degree Audit Survey](#)"
- [Links to an external site.](#)
- " listed on this module with the information that is needing to be updated. No need to make an appointment! We will get it fixed for you!

What is a Pre-Req Drop?

Students must meet course prerequisites in order to continue on the next course. **The department will not grant students prerequisite waivers. Please do not contact faculty regarding prerequisite waivers.** If you are enrolled in a course that you do not meet the prerequisite, the CHE Advising Office will drop you on the second class day. You will need to drop the course and replace with the correct course. Below is the procedure the advising office follows:

1. Prerequisite reports are generated about a week before the semester beings.
2. CHE Advising sends 1st SAN (Secured Academic Note) emails to students who do not meet prerequisites for upcoming courses. Course(s) will be dropped on the second class day after 3PM.
3. Prerequisite Reports are generated the first day of classes.
4. CHE Advising sends 2nd SAN (Secured Academic Note) emails to students who do not meet prerequisites for upcoming courses. Course(s) will be dropped on the second class day after 3PM.
5. CHE Advising sends drop SAN (Secured Academic Note) emails to students who do not meet prerequisites on the second class day. Course(s) have been dropped from record.

What is Research for Credit?

WHAT IS RESEARCH FOR CREDIT?

Students perform supervised undergraduate research projects and receive credit applied toward their Chemical Engineering degree. Students must find a Research opportunity before registering for this class. We **DO NOT** match students to a research opportunity.

CAN IT COUNT TOWARDS MY DEGREE?

A maximum limit of one whole Tech Elective (either CHE 377K/L or a combination of Research for Credit courses that adds up to 3 Hours) can be taken as one of the students four required Tech Electives to count in ANY area. A separate course of Research for Credit can also be counted towards the 4-HR Chemistry Elective Lab requirement. This means in total, a student can have Research for Credit count for ONE Tech Elective and the Lab Portion of their required 4-HR CH Elective.

HOW DO I REGISTER?

You are **REQUIRED** to submit a Research for Credit Form prior to registering for the class. When completing the form, you will either choose CHE 177K/L, CHE 277K/L, or CHE 377K/L. Rule of thumb: 3 Hours per week in lab equals 1 Credit Hour; with K being the first time you take Research for Credit and L being the second time you take Research for Credit or any time after. Once you submit the form, an advisor will process the form and either give you the ability to add the class on your own or add you themselves.

PRE-REQUISITES FOR THE COURSE

- Minimum GPA of 3.0. If you DO NOT have a GPA of at least 3.0, you will also need to ask the CHE Department Faculty Advisor for permission to take a Research for Credit course.

- Your PI must be in ChE. If they are not under ChE, you will need to ask the CHE Department Faculty Advisor for permission to earn research credit with a PI outside our department.
- Students must submit a completed Research for Credit Form to the CHE Advising office (CPE 2.706 or via email at advising@che.utexas.edu).
- Students CANNOT take Research for Credit if it is their first semester at UT Austin.
- Must be a CHE Major. If you are doing Research for Credit with a CHE Faculty member, I recommend reaching out to your Major Advising Office to see if there is an appropriate Research for Credit course in your major. This class is how we track CHE majors doing Research for Credit.

COURSE SYLLABUS

[CHE Research for Credit Syllabus](#)

NOT SURE WHERE TO START?

Follow these steps to find an undergraduate research opportunity:

1. Review the [Research Areas](#)
2. [Find a Research Advisor](#)
3. within the department.
4. Identify 2-3 faculty members whose research interests you.
5. Request a meeting with the faculty members and include your resume.
6. Meet with the faculty members and express your interest in their research.
7. Ask if they have any paid or volunteer research opportunities for undergraduate students.
8. Follow up your meeting with a brief thank you by email and reiterate your interest in their research.

9. If invited to join a lab and you want to do Research for Credit (**ONLY IF NOT PAID**), complete and submit the [Research for Credit Form](#) NO LATER THAN 4 PM ON THE 6TH DAY OF CLASS.

Will Classes I Took Prior to UT Transfer?

Transferring courses is a frequent question we get asked!

We understand that you have taken courses elsewhere whether it was dual credit or at a community college/university, and want to know if it counts within your degree. The Advising Office will work closely with each student to review their transfer courses, but ultimately, the Admissions Office will evaluate your transcript and determine if those courses are equivalent.

Students can also check the [Automated Transfer Equivalency System \(ATE\)](#)

[Links to an external site.](#)

to see if their courses are equivalent to UT courses and if it will apply towards their major.
