

Step-by-Step Guide: Alerts

This step-by-step guide provides a clear and concise process for reviewing alerts related to course prerequisites and corequisites. By following these instructions, users can easily identify if they have deviated from the required sequence and take appropriate action to ensure they meet the prerequisites before enrolling. This guide is essential for students who want to stay on track with their academic requirements and avoid any potential setbacks in their course progression.

1 Navigate to <https://utengineering.navigate.eab.com/app/#/my/priority-feed/>

2 Click "Planner"

3 Alerts will indicate if you've gotten out of sequence with prerequisites and corequisites.

4 Click here.

5 Review course prerequisites/corequisites.

Click "Close drawer."

Course Alerts

Pre-requisite Alert(s):

The following pre-requisite(s) to CHE 319 - TRANSPORT PHENOMENA are currently planned in a future term and need to be completed before CHE 319 - TRANSPORT PHENOMENA.

- CHE 317 - INTRO TO CHEM ENGR ANALYSIS
- M 427J - DIFF EQNS WITH LINEAR ALGEBRA

6 Move course into the appropriate term when prerequisites will be met.

Click here.

The screenshot shows a course management interface. On the left, there is a list of courses with two entries highlighted in green: "1 ENGR I: PRCSS SYST/PRD ENGR II: ENGR ECON". On the right, a panel titled "Courses (7)" lists the following courses:

- [CH 204 - INTRO TO CHEMICAL PRACTICE](#)
No Scheduled Sections
- [CH 302 - PRINCIPLES OF CHEMISTRY II](#)
No Scheduled Sections
- [CHE 210 - INTRODUCTION TO COM](#)
No Scheduled Sections
- [CHE 319 - TRANSPORT PHENOMENA](#)
No Scheduled Sections
- [GOV 310L - AMERICAN GOVERNMENT](#)
No Scheduled Sections
- [M 408D - SEQ, SERIES, AND MULTIVAR CALC](#)
No Scheduled Sections
- [PHY 303K - ENGINEERING PHYSICS I](#)
No Scheduled Sections

A red triangle icon is visible next to the "CHE 319 - TRANSPORT PHENOMENA" and "PHY 303K - ENGINEERING PHYSICS I" entries. A "View Alerts" button is located to the right of the "CHE 210 - INTRODUCTION TO COM" entry.

7 Click "Move to Term"

The screenshot shows the same course management interface as above. The "CHE 319 - TRANSPORT PHENOMENA" entry is highlighted. A context menu is open over this entry, showing the following options:

- Course Details
- Move To Term
- Remove From Term

The "Move To Term" option is highlighted with an orange circle. The "Remove From Term" option is also visible. The "CHE 319 - TRANSPORT PHENOMENA" entry is marked with a red triangle icon.

8

Click "SPRING 2025"

The screenshot displays a course planning interface. On the left, a table with a 'TEMPLATE' header contains two rows, each with a green-bordered box containing the text 'B S CHEM ENGR I: PRCSY SYST/PRD ENGR II: ENGR ECON'. A dropdown menu is open over the table, listing terms from 'FALL 2023' to 'SPRING 2027'. The 'SPRING 2025' option is highlighted with an orange circle. On the right, a sidebar shows 'CREDITS PLANNED: 20', 'Planned Placeholders (1)' including 'LABORATORY FOR PHY 303K', and 'Courses (7)' including 'CH 204 - INTRO TO CHEMICAL PRACTICE', 'CH 302 - PRINCIPLES OF CHEMISTRY II', 'CHE 210 - INTRODUCTION TO COMPUTING', 'CHE 319 - TRANSPORT PHENOMENA', and 'PHY 303K - ENGINEERING PHYSICS I'. A 'Course Details' dropdown menu is also open, showing options like 'Move To Term' and 'Remove From Term'.
